

Chart Control brings brand consistency to chart formatting

Chart Control builds and formats Excel charts to your corporate design specifications.

Chart Control creates charts for pasting into reports, proposals, presentations and pitch books across your Office suite. Existing charts can be re-coloured or re-sized to be on-brand, with any other user applied customisation being preserved. The easy-to-use Chart Control ribbon also features a suite of shapes for chart annotation.

Key features

- Create charts to your corporate specification of font, colour, line style and sizes
- Simple to use, with previews, so all levels of user consistently create professional looking Excel charts
- Have different chart styles for multiple outputs and sizes (Word, PowerPoint etc.)
- Re-colour or re-size existing charts to preserve user applied customisation
- Icon and shape gallery for chart annotation
- Integrates seamlessly into Excel

About us

CONNECTING DESIGN WITH TECHNOLOGY

Mediasterling specialises in software systems and creative services for producing branded financial and corporate communications. These include financial research, reports, bids and presentations. We also design and produce annual reports, corporate websites and investor communications. We are experts in developing highly automated applications, particularly within Microsoft Office to ensure seamless business integration and ease of use.

With over 16 years' experience, our products and services are proven as demonstrated by our extensive list of global corporate clients. We design systems and develop applications and are highly experienced in delivering solutions for both large and small teams, locally and globally. We produce and manage all aspects of the project in-house from design, build and testing through to IT liaison, training, documentation and support.
